DETAILED ACTION

This letter is a supplement to the office action mailed on 7/2/2009. The newly added claims 19-25 in the amendment filed 4/24/2009 were not addressed. This supplemental letter addresses claims 19-25 and also restarts the time period for reply to begin from the mailing date of this letter.

A lack of unity has been made in the application (see election requirement mailed on 3/24/2009 and election received on 4/24/2009). The applicant elected to prosecute the invention directed to the binding piece. Claims 19-25 recite the binding piece in the preamble of the claims. However, the binding piece does not technically contribute to the binding apparatus, i.e., the binding apparatus can be used with different binding pieces. Therefore, claims 19-25 have been withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 have been rejected under 35 U.S.C. 102(b) as being clearly anticipated by Niedecker, 5735022.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 has been rejected under 35 U.S.C. 103(a) as being unpatentable over Niedecker, 5735022 in vie of Japanese reference, JP2002293364. Niedecker discloses a connector means

(25) attaching each binding piece to the next binding piece. The claim requires that the connecting portion have a tapered shape, which is not shown clearly in Niedecker. The Japanese reference shows that it is old and well known to make the connector into a tapered shaped connector (32, figure 6) to facilitate the ease of separation at the smaller end of the connector. It would have been obvious to make Niedecker's connector into a tapered shape.

Allowable Subject Matter

Claims 6-8 have been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
